

VISHAL KUMAR

Full Stack Developer · Next.js & MERN · SaaS & AI Integration

+92 300 0249930 vishall.kandharee@gmail.com [Linkedin](#) github.com/VISHALLkandharee

Sukkur, Pakistan · Open to Remote

PROFESSIONAL SUMMARY

Full Stack Developer with **6 production applications** shipped end-to-end — including a multi-tenant SaaS platform with **Stripe billing, Socket.io real-time sync, and BullMQ job queues**, and an AI-powered route optimization tool built with the **Anthropic Claude SDK**. Proficient in Next.js, TypeScript, and the MERN stack, with hands-on experience across auth systems (JWT, NextAuth, OAuth), databases (PostgreSQL, MongoDB, Prisma, Supabase), maps (Leaflet), and cloud deployment. Completing a B.Sc. in Artificial Intelligence (CGPA: 3.71/4.0) at Szabist University.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Zustand, Framer Motion, React Query, React Native, Chart.js
Backend	Node.js, Express.js, RESTful APIs, JWT (+ Refresh Rotation), NextAuth, OAuth, Stripe + Webhooks, Socket.io, BullMQ + Redis, Twilio
Databases	MongoDB, PostgreSQL, Supabase, Prisma ORM, Firebase, SQL
AI / Maps	Anthropic Claude SDK, OpenAI API, Leaflet, Live Market Data APIs, Workflow Automation
DevOps & Tools	Git, GitHub, Vercel, Railway, Cloudinary, Zod, Postman, CI/CD

PROJECTS

Task-Flow — Multi-tenant Team Task Management SaaS [task-flow-nu-sepia.vercel.app/](#) · [GH](#):

[VISHALLkandharee/Task-Flow](#)

Stack: Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Stripe + Webhooks, Socket.io, BullMQ + Redis, Tailwind CSS

- Complete multi-tenant SaaS with **Stripe subscription billing and webhook handling** — tenant-isolated workspaces with data scoped at the database level; RBAC enforced at both API and UI with three permission tiers (Admin, Manager, Member)
- Drag-and-drop Kanban board powered by **Socket.io** — task updates broadcast instantly to all team members in the workspace with zero page refresh
- **BullMQ + Redis** job queue handling email notifications, task assignment alerts, and scheduled reminders asynchronously — fully decoupled from the API request cycle

Route-Master — AI-Powered Route Optimization for Local Businesses [route-master-sooty.vercel.app](#) ·

[GH: VISHALLkandharee/Route-Master](#)

Stack: Next.js 16, TypeScript, Anthropic Claude SDK, Supabase, Leaflet, Stripe, Zustand, Framer Motion, Zod

- Built with the **Anthropic Claude SDK** — AI intelligently plans and optimises daily delivery routes for solo business owners, reducing manual route planning effort
- Interactive map interface via **Leaflet**, Stripe subscription billing, Supabase backend, Zustand for client state, and Framer Motion UI animations

SaaS Pulse — Real-Time Startup Analytics Dashboard [saas-pulse-liart.vercel.app](#) · [GH](#):

[VISHALLkandharee/Saas-Pulse](#)

Stack: Next.js, Node.js, MongoDB, JWT, Role-Based Access Control, Tailwind CSS

- Founder command center tracking **MRR, churn, and live user signups** with a zero-latency activity feed for real-time business decisions
- Custom JWT auth with RBAC — scoped admin and team member access tiers

InvestTrack — Investment Portfolio Tracker ■ investment-tracker-next-app.vercel.app · [GH](#):

[VISHALLkandharee/Investment-Tracker-next-app](#)

Stack: Next.js, TypeScript, PostgreSQL, Prisma ORM, NextAuth (Google + GitHub OAuth), Supabase

- Portfolio dashboard with **multi-provider OAuth** (Google + GitHub via NextAuth), live market data feeds, and type-safe PostgreSQL storage via Prisma ORM

Room Finder ■ room-finder-chi.vercel.app · [GH: VISHALLkandharee/Room-Finder](#)

Stack: React, TypeScript, Vite, Supabase, Cloudinary, Tailwind CSS

- Two-sided rental marketplace — landlords post listings, tenants search by location and price; image uploads via Cloudinary

Habit Tracker [GH: VISHALLkandharee/Habit-Tracker-Mobile-app](#)

Stack: React Native, TypeScript, Node.js, MongoDB

- Cross-platform iOS/Android habit tracking app with daily streaks, analytics dashboard, and a custom Node.js/MongoDB backend

Also: Weather App (React, Chart.js, Firebase, React Query) · Advanced TypeScript Backend · Blog App · Expense Tracker

EXPERIENCE

Full Stack Developer — Freelance

2023 – Present

Fiverr · Facebook Developer Communities · WhatsApp Referral Network · Remote

- Secured and delivered **10+ client projects** across Fiverr, Facebook developer groups, and direct WhatsApp referrals — building a steady client pipeline through reputation and word-of-mouth alone, with zero paid advertising
- Owned every project **end-to-end**: client discovery, scoping, architecture, full-stack development, cloud deployment, and post-launch support — the complete product lifecycle, handled solo
- Built a base of **repeat clients and inbound referrals** across multiple countries by consistently delivering on time, communicating clearly, and going beyond the brief — clients came back and brought others
- Delivered full-stack solutions in React.js, Next.js, and Node.js for businesses across diverse industries and time zones, adapting quickly to each client's tech requirements and feedback style

EDUCATION

B.Sc. in Artificial Intelligence

CGPA: 3.71 / 4.00

Szabist University, Hyderabad · Expected 2026

- Top GPA Scholarship recipient — 2nd Semester
- Relevant coursework: Machine Learning, Deep Learning, Algorithms, Data Structures, Neural Networks

ADDITIONAL

Languages: English (Professional) · Urdu / Hindi (Fluent) · Sindhi (Native) **Availability:** Open to full-time remote, contract, or freelance roles globally
